

SECURE YOUR COMPANY'S RENEWABLE ENERGY SUPPLY

INTERSOLAR SUMMIT SPAIN CLOSES THE GAP BETWEEN CORPORATE ENERGY PURCHASERS, AND SELLERS FOR RENEWABLE ENERGY

Are you looking for long-term solutions to secure the energy supply of your company? Would you like to become independent of increasing energy prices? Are you searching for ways to contract directly for renewable energy? If the answer to one of these questions is "yes", you should definitely join us at Intersolar Summit Spain on June 18, 2019, in Barcelona!

Medium-sized and large companies need to increasingly look for ways to protect themselves against future energy price increases and to ensure a climate-neutral energy supply. As renewable energy becomes more and more cost-competitive with conventional energy technologies in the coming years, new ways to secure a company's energy demand are emerging. Companies choose more and more the way to contract directly for renewable energy and decide upon long-term contracts with private renewable energy sellers.

Intersolar Summit Spain is dedicated to solar energy and corporate sourcing. We are going to discuss the PV market development in Spain, grid parity opportunities, and the different corporate sourcing models with their assets and drawbacks.

As energy procurement/purchasing manager, you will have the chance to network for free with renewable energy experts and sellers for renewable energy and to secure your company's energy supply!

SPAIN'S VAST POTENTIAL FOR CORPORATE SOURCING

This year, around 4 GW from auctions alone are likely to be installed in Spain, which might turn the country into Europe's #1 solar market. But the growth potential of low-cost solar goes far beyond government auctions. With a pipeline of over 30 GW of subsidy-free solar projects for corporate sourcing, Spain is the place to go for anyone interested in large-scale solar power.

Which kind of corporate sourcing models or Power Purchase Agreements are suitable for your company? Which supplier or seller of renewable energy could be your long-term business partner? Find your answers on June 18, 2019, in Barcelona and become independent of energy price increases!
